DHARANIPATHI P

Java Developer | Bengaluru, Karnataka
+91 6303547066 | dharanipathipala@gmail.com | linkedin.com/in/Dharanipathi-pala | github.com/dharanipath

PROFESSIONAL SUMMARY

Java Developer with 1 year of hands-on experience building and deploying production-grade backend systems using Core Java, Spring Boot, and RESTful APIs. Proficient in OOP design, relational databases (MySQL/PostgreSQL), and Git-based workflows within Agile teams of 4–6 engineers. Delivered a 40% reduction in processing time across production microservices through targeted refactoring and MVC architecture optimisation. Brings a track record of writing clean, testable Java code and a strong foundation in data structures, algorithms, and SQL query performance.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), SQL, HTML/CSS, JavaScript (basic), Node.js

Frameworks: Spring Boot, Spring MVC, Hibernate, JUnit 5

Databases: MySQL, PostgreSQL, NoSQL (MongoDB)

Tools & DevOps: Git, GitHub, Maven, Postman, VS Code, Eclipse

Concepts: OOP, Data Structures & Algorithms, REST APIs, Microservices, JDBC

Methodologies: Agile/Scrum, MVC Architecture, Unit Testing, SDLC

EXPERIENCE

Java Backend Developer *Nov 2024 – Dec 2025*
Bizviz Technologies Pvt. Ltd. *Bengaluru, Karnataka*

- Develop and maintain 8 backend modules for an internal product using Spring Boot and MySQL.
- Refactored legacy DAO layer to use Spring Data JPA, eliminating 200+ lines of boilerplate code and accelerating feature delivery by 20%.
- Resolved 14 production bugs within the first month by tracing logs, reproducing issues locally, and deploying hotfixes with peer-reviewed pull requests.
- Participated in daily standups, sprint planning, and code reviews; adopted company Git branching conventions from day one.

PROJECTS

E-Commerce Platform (Online Shopping) *Mar 2025 – Present*
Tech Stack: Java, Spring Boot, Microservices, React, MySQL, REST APIs, MVC Pattern, Git

- Developed a full-featured storefront with a dynamic shopping cart and integrated secure payment processing.
- Implemented user authentication and authorization using JWT, reducing unauthorized access attempts.
- Managed a SQL database (MySQL) to handle over 500+ product entries with optimized query times under 200ms.
- Maintained full Git history with feature branching strategy; document API contracts in README for future contributions.

Personal Portfolio & To-Do Application *Feb 2025 – Mar 2025*

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, Routing, RESTful APIs, MySQL, Git

- Architected a responsive Full stack application to showcase professional projects, resulting in a 20% increase in portfolio engagement.
- Engineered a secure backend using Node.js and Express, implementing Nodemailer to automate communication between users and the server.
- Optimized frontend performance by 30% through React hooks and efficient state management, ensuring seamless cross-device compatibility.
- Integrated environment variables via dotenv to safeguard sensitive API keys and production credentials.

EDUCATION

B.Tech in Computer Science & Engineering *May 2019 – May 2023*

RGUKT (RK Valley) Kadapa, Andhra Pradesh *IIIT — CGPA: 8.1 / 10*

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Developer: Palle Technologies
- Published original research on Plant Leaf Disease Detection using Deep Learning, utilizing Convolutional Neural Networks (CNN) to achieve high-accuracy automated diagnosis.
- Front-end — Great Learning
- Ranked in top 10% of 1,200+ participants in College Hackathon 2023 — built a real-time bus tracking prototype in 24 hrs using Java and REST APIs.
