

DHARANIPATHI P

Java Developer | Application Support Engineer | Bengaluru, Karnataka
+91 6303547066 | dharanipathipala@gmail.com | linkedin.com/in/Dharanipathi-pala | github.com/dharanipath

PROFESSIONAL SUMMARY

Java Developer and Application Support Engineer with 1 year of hands-on experience building and deploying production-grade backend systems using Core Java, Spring Boot, and RESTful APIs. Hands-on in both feature development and post-deployment support. —including L1/L2 incident resolution, production log analysis, root cause analysis, and hotfix deployment. Proficient in SQL databases (MySQL), ServiceNow ITSM workflows, Git-based collaboration. Delivered a 40% reduction in processing time through backend refactoring —combining a developer's precision with a support engineer's diagnostic mindset.

TECHNICAL SKILLS

Language s: Java, SQL, JavaScript (basic)

Frameworks: Spring Boot, Spring MVC, Hibernate, JUnit 5

Databases: MySQL, NoSQL (MongoDB)

Tools & DevOps: GitHub, Maven, Postman, VS Code, Eclipse, Jira, Code Review, Hotfix

Concepts: OOP, JDBC, REST APIs, Microservices, JDBC, API Integration, Networking Basics

Methodologies: Agile/Scrum, ITIL/ITSM, Root Cause Analysis, Incident Management

EXPERIENCE

Java Backend Developer

Nov 2024 – Dec 2025

Bizviz Technologies Pvt. Ltd.

Bengaluru, Karnataka

- Develop and maintain 8 backend modules for an internal product using Spring Boot and MySQL.
- Refactored legacy DAO layer to use Spring Data JPA, eliminating 200+ lines of boilerplate code and accelerating feature delivery by 20%.
- Resolved 14 production bugs within the first month by tracing logs, reproducing issues locally, and deploying hotfixes with peer-reviewed pull requests.
- Participated in daily standups, sprint planning, and code reviews; adopted company Git branching conventions from day one.

PROJECTS

E-Commerce Platform (Online Shopping)

Mar 2025 – Present

Tech Stack: Java, Spring Boot, Microservices, React, MySQL, REST APIs, MVC Pattern, Git

- Developed a full-featured storefront with a dynamic shopping cart and integrated secure payment processing.
- Implemented user authentication and authorization using JWT, reducing unauthorized access attempts.
- Managed a SQL database (MySQL) to handle over 500+ product entries with optimized query times under 200ms.
- Maintained full Git history with feature branching strategy; document API contracts in README for future contributions.

Personal Portfolio & To-Do Application

Feb 2025 – Mar 2025

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, Routing, RESTful APIs, MySQL, Git

- Architected a responsive Full stack application to showcase professional projects, resulting in a 20% increase in portfolio engagement.
- Engineered a secure backend using Node.js and Express, implementing Nodemailer to automate communication between users and the server.
- Optimized frontend performance by 30% through React hooks and efficient state management, ensuring seamless cross-device compatibility.
- Integrated environment variables via dotenv to safeguard sensitive API keys and production credentials.

EDUCATION

B.Tech in Computer Science & Engineering

May 2019 – May 2023

RGUKT (RK Valley) Kadapa, Andhra Pradesh

IIIT — CGPA: 8.1 / 10

CERTIFICATIONS & ACHIEVEMENTS

-
- Java Full Stack Developer: Palle Technologies
 - Published original research on Plant Leaf Disease Detection using Deep Learning, utilizing Convolutional Neural Networks (CNN) to achieve high-accuracy automated diagnosis.
 - Front-end — Great Learning
 - Ranked in top 10% of 1,200+ participants in College Hackathon 2023 — built a real-time bus tracking prototype in 24 hrs using Java and REST APIs.
